

PMICOS ANNUAL CONFERENCE TO FEATURE BUILDING INFORMATION MODELING AND MORE

[Previous](#) | [Next](#)

Make plans now to attend the Project Management Institute College of Scheduling's (PMICOS) 6th Annual Conference, *Revolutionary Scheduling*, at the Renaissance Waterfront Hotel in Boston, May 17-20. A host of new speakers and education sessions are on the agenda, including scheduling research, scheduling methods, risk management, earned value, enterprise scheduling, Building Information Modeling (BIM) and other information technology topics. The four BIM sessions and research topics alone are worth the price of admission; but see for yourself at the conference website: <http://www.pmicosconference.com/>.

You won't want to miss the 60 educational sessions and town hall meetings (closer to 70 if you include training sessions and the various features speakers). Even the most seasoned schedulers and project managers will find something of value in each of the nine breakout sessions. More details, including times, speakers and speaker abstracts, are available at the interactive conference agenda at <http://www.pmicosconference.com/agenda.html>.
